**SERVICE CHANGES/PUBLIC FEEDBACK**  
Presented by: Aida Copic

We have funding to implement three new routes.

**Proposed Changes Phase A, B, & C**

Phase A  
• As part of long-term strategy, discontinue low-performing express service, highcost circulators and some low-performing local routes

Phase B and C  
• Implement Phase B and C only if necessary for balancing TARC’s budget  
• Phase B and C would not be permanent changes  
• Service will be gradually restored in order of priority  
• These interim steps are planned to ensure TARC’s financial health and stability, and are not part of TARC’s long-term strategy  
• Recommendations are based on the extensive COA technical analysis and performance evaluation

**Consideration**
• Impact on customers, other routes or transfers available to passengers
• Impact on low income, minorities and TARC 3 customers
• Impact on TARC partnerships – UofL, Humana, Metro, UPS
• Balanced decisions – reductions only as necessary

Public Involvement Process

• Community and stakeholders engagement - present all proposed changes, but implement only as needed
• Restore service when ridership improves, based on demand

Request by Chuck Rogers: TARC3 riders will be grandfathered into their current services despite changes to routes.
Request by JC Stites: What is the cost for the fixed route rider over the past five years? What is your goal for it to be for the future?
